## MESSAGE

Upon review of the attached warning letter, I recommend that a Compliance Order be issued to the subject facility for the following reasons:

1. Failure of the facility to implement a groundwater monitoring system (Compliance Order should be issued per 1/22/82 MacMillan Memorandum).
2. Site is unfenced, unmonitored, and accessible to persons or livestock via an unpaved road. Facility is located in an Industrial Park on an Indian Reservation.
3. I observed releases of hazardous waste in several locations.
4. Damaged containers holding waste in the hazardous waste storage area were open. REPLY
5. Up to 21 potential violations of RCRA were observed; 8 of which are potential class I.

According to the criteria for determining an imminent and substantial endangerment, this facility appears to qualify. This determination was made around 12/30, at which time I verbally relayed it to you.

From : Karen O'Regan, Field Investigator  
Field Inspections Section, T-3-2
